Summary

Digital Enterprise Software Developer with **3+ years of experience** designing, developing, testing, and deploying software applications across the full **Agile DevSecOps** lifecycle. Proficient in **Python, C#, C++, Java, and JavaScript** with strong experience in **SQL and NoSQL** databases, **CI/CD pipelines**, and **cloud platforms** including **Azure and AWS**. Hands-on background in **AI/ML solutions**, automated testing, and process automation, with a proven record of delivering clean, well-documented code in collaborative, multidisciplinary engineering environments.

Education

- **Purdue University** Fort Wayne, Indiana, USA
Master of Science in Computer Science; GPA: 3.9/4.0 August 2024 - May 2026
 - Relevant Coursework: Data Structures & Algorithms, Machine Learning, DBMS, Software Design, UI/UX Design
- **Amrita Vishwa Vidyapeetham** Kerala, India
Bachelor of Technology in Mechanical Engineering; GPA: 3.45/4.0 July 2017 - June 2021

Professional Experience

- **Octave** Hyderabad, India
Digital Enterprise Software Developer June 2021 - July 2024
 - Designed, developed, tested, and deployed **20+ software applications and backend services** using **Python, C#, C++, and Java**, delivering clean, well-documented code that reduced API response latency by **35%** across enterprise engineering tools.
 - Automated manual engineering processes and **process flows** by developing software solutions across **15+ modules**, improving workflow efficiency by **15%** and reducing manual design operations by **25%** for **1,000+** users.
 - Optimized complex **SQL** queries and backend business logic handling **1M+ records** per run, reducing execution time by **45%** and improving data infrastructure throughput and system responsiveness.
 - Participated in structured **code reviews** and contributed to improving code quality standards, resolving **95%+** of Coverity static analysis issues and fixing **30+ high-priority** production defects to reduce runtime crashes by **40%**.
 - Collaborated with multidisciplinary teams of developers, testers, and stakeholders across the full **software development lifecycle** - from requirements gathering and design through development, testing, and deployment - within **Agile/Scrum** delivery cycles.
 - Strengthened **DevSecOps** practices by automating regression testing across **200+ test cases (+30% coverage)**, streamlining **Git** version control workflows (**30% fewer merge conflicts**), and supporting bi-weekly **CI/CD pipeline** deployments across 4+ squads.
 - Maintained and improved existing enterprise software systems, troubleshooting and debugging production defects across 5 major releases to sustain platform stability and performance.
- **Purdue University - CS Department** Fort Wayne, Indiana, USA
Teaching Assistant March 2025 - May 2026
 - Contributed to the development of a course resource platform using **Node.js, React.js, and TypeScript**, improving content accessibility for **100+ students** across multiple course sections.
 - Maintained backend services and **RESTful APIs** with **NoSQL databases**, supporting reliable data retrieval for course materials and student records.
 - Conducted **30+ code reviews** for undergraduate students, providing structured feedback that reinforced clean code practices and reduced recurring errors.
 - Managed **Git-based** version control workflows and coordinated feature delivery across multiple branches with no critical post-deployment issues.

Technical Skills

- **Languages:** Python, C#, C++, Java, JavaScript, SQL, VB.NET
- **AI & ML:** PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, LangChain, RAG Pipelines, NLP, Deep Learning, OpenCV, Prompt Engineering
- **Databases:** SQL Server (MSSQL), PostgreSQL, MySQL, Oracle, MongoDB, NoSQL
- **Cloud Platforms:** Microsoft Azure, AWS, Google Cloud, Docker
- **DevSecOps & CI/CD:** Git, GitHub Actions, Jenkins, CI/CD Pipelines, Automated Testing Frameworks, Coverity Static Analysis
- **Backend & Web:** ASP.NET Core, RESTful APIs, Entity Framework Core, MVC Architecture, Node.js, Express.js, Spring Boot, FastAPI
- **Frontend & UI:** React.js, Angular, JavaScript, HTML5, CSS3, jQuery, XAML, WPF, Figma
- **Architecture & Design:** OOP, SOLID Principles, Design Patterns, DDD, Microservices, Clean Architecture
- **Version Control & Collaboration:** Git, GitHub, Jira, Team Foundation Server (TFS)
- **Methodologies:** Agile, DevSecOps, Scrum, SDLC, Code Reviews
- **Tools & IDEs:** Visual Studio, Visual Studio Code, PyCharm, Postman
- **Operating Systems:** Windows, Linux

Projects

- **RAG Pipeline for Intelligent Q&A** *Python - LangChain - HuggingFace - FAISS - FastAPI - AWS*
 - Designed and implemented an end-to-end **AI solution** using **Python**, **LangChain**, and **Hugging Face Transformers** to build a production-ready **Retrieval-Augmented Generation (RAG)** pipeline, enabling accurate intelligent question answering over a custom dataset.
 - Built a **FAISS**-based vector store for semantic document retrieval, integrating embedding models to significantly improve response relevance - demonstrating applied knowledge of **machine learning techniques** and their real-world advantages.
 - Deployed the pipeline with a **FastAPI** backend on **Kaggle** using dual **T4 GPUs**, resolving environment-specific dependency challenges and optimizing inference performance for production-ready execution.
- **Enterprise Workflow Management Platform** *ASP.NET Core 6 - C# - PostgreSQL - CI/CD - GitHub Actions*
 - Designed, developed, and deployed a backend enterprise software application using **ASP.NET Core** and **C#** with Clean Architecture, supporting **50+ workflow templates** and **10,000+ task records** with **35%** improved system reliability.
 - Built secure **RESTful APIs** with JWT authentication backed by **PostgreSQL**, handling **5,000+ requests/day** at **99.9% uptime** and **40%** reduced response latency - automating business process flows end to end.
 - Automated **CI/CD pipelines** using **GitHub Actions** with **90%+ automated test coverage**, reducing deployment time by **50%** throughout the Agile DevSecOps release lifecycle.

Certifications

- **C# Advanced Topics: Classes, Interfaces and OOP** - Udemy
<http://ude.my/UC-42e6805d-8fae-4401-9336-b3e7d79b8bc2>

Achievements

- Received the **“Pat on the Back”** award twice at Hexagon Capability Center India for outstanding bug resolution under tight deadlines.
