Summary

Fullstack Software Engineer with **3+ years of experience** building scalable, reliable, and secure **cloud-based microservices** and web applications using **TypeScript, Python, Node.js, and React.js**. Experienced with **Docker, Kubernetes, CI/CD pipelines**, and **AWS**, with a strong focus on non-functional requirements including reliability, maintainability, and observability. Hands-on with **AI-first development workflows** using tools like Claude and Cursor to accelerate implementation, testing, and documentation. Passionate about high-quality, customer-facing product experiences and taking full ownership of complex technical challenges.

Education

- **Purdue University** Fort Wayne, Indiana, USA
Master of Science in Computer Science; GPA: 3.9/4.0 August 2024 - May 2026
 - Relevant Coursework: Data Structures & Algorithms, Machine Learning, DBMS, Software Design, UI/UX Design
- **Amrita Vishwa Vidyapeetham** Kerala, India
Bachelor of Technology in Mechanical Engineering; GPA: 3.45/4.0 July 2017 - June 2021

Professional Experience

- **Octave** Hyderabad, India
Software Engineer II June 2021 - July 2024
 - Developed and maintained **20+ backend services** using **TypeScript, Python, and .NET Core** within a cloud-based **microservices architecture**, with a strong focus on reliability, maintainability, scalability, and security.
 - Built and maintained **React.js** frontend components integrated with backend services, delivering responsive, performant, and intuitive user interfaces for **1,000+** engineering users across distributed workflows.
 - Optimized complex **SQL queries** and backend business logic handling **1M+ records** per run, reducing execution time by **45%** and improving overall platform responsiveness and observability.
 - Designed scalable, modular components using **SOLID principles** and **component-based architecture** across **15+ modules**, improving code maintainability by **40%** and enabling reliable interoperability across services.
 - Strengthened platform quality by automating regression, unit, and integration testing (**200+ test cases, +30% coverage**), and streamlining **Git** workflows (**30% fewer merge conflicts**) within Agile/Scrum teams.
 - Supported bi-weekly **CI/CD** deployments on **AWS** using **Docker** and **Kubernetes**, resolving **30+ high-priority** production defects and reducing runtime crashes by **40%** across 5 major releases.
 - Leveraged **AI-first development workflows** using Claude and Cursor to accelerate prototyping, automated testing, code refactoring, and technical documentation, improving team delivery velocity.
- **Purdue University - CS Department** Fort Wayne, Indiana, USA
Teaching Assistant March 2025 - May 2026
 - Contributed to a course resource platform using **React.js, TypeScript, and Node.js**, improving content accessibility and user experience for **100+ students** across multiple course sections.
 - Maintained backend services and **RESTful APIs** with **NoSQL databases**, supporting reliable and observable data retrieval for course materials and student records.
 - Conducted **30+ code reviews** mentoring on clean code practices, **Git** workflows, testing, and documentation standards, reducing recurring errors across student teams.
 - Managed **Git-based** version control workflows and coordinated feature delivery across multiple branches with no critical post-deployment issues.

Technical Skills

- **Languages:** TypeScript, Python, JavaScript, C#, Java, SQL
- **Frontend & UI:** React.js, Vue.js, Angular, Next.js, HTML5, CSS3, component-based architecture, reactive data models, responsive design, Figma
- **Backend & Microservices:** Node.js, Express.js, ASP.NET Core, FastAPI, Spring Boot, RESTful APIs, MVC Architecture, microservices, high-availability services
- **Cloud & DevOps:** AWS, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD Pipelines, infrastructure-as-code, Microsoft Azure
- **Auth & Security:** OAuth 2.0, OpenID Connect, JWT authentication, role-based access control (RBAC), secure login flows

- **Databases:** PostgreSQL, SQL Server (MSSQL), MySQL, Oracle, MongoDB, NoSQL
- **Testing & Observability:** Jest, Cypress, Playwright, unit testing, regression testing, integration testing, Datadog, telemetry, monitoring
- **AI & LLM Tools:** Claude, Cursor, LangChain, RAG Pipelines, Hugging Face Transformers, OpenAI GPT, Prompt Engineering
- **Architecture & Design:** DSA, OOP, SOLID Principles, Design Patterns, Microservices Architecture, Clean Architecture, DDD
- **Version Control & Collaboration:** Git, GitHub, Jira, Team Foundation Server (TFS)
- **Methodologies:** Agile, Scrum, SDLC, Code Reviews

Projects

- **Enterprise Workflow Management Platform** *TypeScript - React.js - ASP.NET Core 6 - PostgreSQL - Docker - AWS - CI/CD*
 - Built a full-stack enterprise platform with a **React.js and TypeScript** frontend and **ASP.NET Core** backend, delivering a scalable, reliable, and secure cloud-based microservice supporting **50+ workflow templates** and **10,000+ task records**.
 - Developed secure **RESTful APIs** with **JWT authentication** and **role-based access control** handling **5,000+ requests/day** at **99.9% uptime**, reducing response latency by **40%** across mobile and cross-platform clients.
 - Automated **CI/CD pipelines** using **GitHub Actions** and **Docker** on **AWS**, reducing deployment time by **50%** and maintaining **90%+ test coverage** with unit, regression, and integration tests.
- **RAG Pipeline for Intelligent Q&A** *Python - TypeScript - LangChain - HuggingFace - FAISS - FastAPI*
 - Designed and deployed an end-to-end **Retrieval-Augmented Generation (RAG)** pipeline using **Python**, **LangChain**, and **Hugging Face Transformers**, enabling accurate question answering with reliable document retrieval.
 - Built a **FAISS**-based vector store for semantic document indexing and retrieval, integrating embedding models to significantly improve response relevance and context accuracy.
 - Deployed the pipeline with a **FastAPI** backend on **Kaggle** using dual **T4 GPUs**, leveraging **AI-assisted development** workflows to accelerate testing, documentation, and production-ready execution.

Certifications

- **C# Advanced Topics: Classes, Interfaces and OOP** - Udemy
<http://ude.my/UC-42e6805d-8fae-4401-9336-b3e7d79b8bc2>

Achievements

- Received the **“Pat on the Back”** award twice at Hexagon Capability Center India for outstanding bug resolution under tight deadlines.
