Summary

Software Developer with **3+ years of experience** designing, developing, and maintaining **.NET Core, ASP.NET, and C#** applications across web, desktop, and backend domains. Proven expertise in **WinForms, XAML, WPF, Entity Framework Core, SQL Server, and LINQ**, with hands-on experience in **Visual Studio, TFS, and Azure DevOps**. Strong track record of collaborating with business stakeholders to gather requirements, troubleshoot production issues, and deliver reliable, maintainable software solutions from concept through deployment.

Education

- **Purdue University** Fort Wayne, Indiana, USA
Master of Science in Computer Science; GPA: 3.9/4.0 August 2024 - May 2026
 - Relevant Coursework: Data Structures & Algorithms, Machine Learning, DBMS, Software Design, UI/UX Design
- **Amrita Vishwa Vidyapeetham** Kerala, India
Bachelor of Technology in Mechanical Engineering; GPA: 3.45/4.0 July 2017 - June 2021

Professional Experience

- **Octave** Hyderabad, India
Software Developer June 2021 - July 2024
 - Designed, developed, and maintained **.NET Core and C#** applications including web solutions and backend services, using **ASP.NET MVC, Entity Framework Core, and LINQ** to deliver reliable, production-grade software from concept through deployment.
 - Built and enhanced **WinForms and XAML/WPF** desktop applications, modernizing core engineering modules and improving workflow efficiency for **1,000+** end users across distributed environments.
 - Developed and optimized **20+ RESTful backend services** using **C#, .NET Core, and SQL Server**, reducing API response latency by **35%** and supporting high-throughput enterprise data exchange.
 - Optimized complex **SQL queries** and **LINQ**-based backend logic handling **1M+ records** per run using **SQL Server Management Studio**, reducing execution time by **45%** and improving system responsiveness.
 - Participated in **code reviews** and resolved **30+ high-priority** production defects, troubleshooting and debugging application and system issues across **.NET Framework 4.5+** and **.NET Core** stacks, reducing runtime crashes by **40%**.
 - Managed version control and CI/CD workflows using **TFS and Git**, streamlining release cycles (**30% fewer merge conflicts**) and supporting bi-weekly deployments across Agile/Scrum teams.
 - Collaborated directly with business stakeholders and end users to gather requirements, analyze problems, and deliver effective technical solutions across **5 major software releases**.
- **Purdue University - CS Department** Fort Wayne, Indiana, USA
Teaching Assistant March 2025 - May 2026
 - Contributed to a course resource platform using **React.js, TypeScript, and Node.js**, improving content accessibility for **100+ students** across multiple course sections.
 - Maintained backend services and **RESTful APIs** with **NoSQL databases**, supporting reliable data retrieval for course materials and student records.
 - Conducted **30+ code reviews** mentoring on clean code practices, **Git** workflows, and debugging standards, reducing recurring errors across student teams.
 - Managed **Git-based** version control workflows and coordinated feature delivery across multiple branches with no critical post-deployment issues.

Technical Skills

- **Languages:** C#, SQL, JavaScript, TypeScript, Python, Java, VB.NET
- **.NET Stack:** .NET Core, .NET Framework (4.5-10.x), ASP.NET MVC, Entity Framework Core, LINQ, Web API, Console applications, UWP
- **Desktop Development:** WinForms, WPF, XAML, UWP, WinUI3
- **Web Development:** Blazor, ASP.NET, MVC, HTML5, CSS3, React.js, JavaScript, TypeScript
- **Databases & Reporting:** SQL Server (MSSQL), SQL Server Management Studio (SSMS), SSRS, PostgreSQL, MySQL, Oracle, MongoDB
- **DevOps & Version Control:** Visual Studio, TFS, Azure DevOps, Git, GitHub, CI/CD Pipelines, GitHub Actions, Jenkins

- **Cloud & Infrastructure:** Azure (Event Hub, Functions), AWS, Docker, Kubernetes, Microsoft Azure
- **Architecture & Design:** OOP, SOLID Principles, Design Patterns, Microservices Architecture, Clean Architecture, DDD
- **AI & ML:** PyTorch, TensorFlow, LangChain, RAG Pipelines, Hugging Face Transformers, NLP, Deep Learning
- **Methodologies:** Agile, Scrum, SDLC, Code Reviews
- **Operating Systems:** Windows, Linux

Projects

- **Enterprise Workflow Management Platform***ASP.NET Core 6 - C# - Entity Framework Core - SQL Server - LINQ - CI/CD*
 - Architected and deployed a backend for an enterprise workflow management platform using **ASP.NET Core**, **C#**, **Entity Framework Core**, and **LINQ** with Clean Architecture, supporting **50+ workflow templates** and **10,000+ task records** with **35%** improved reliability.
 - Developed secure **RESTful Web APIs** with **JWT authentication** handling **5,000+ requests/day** at **99.9% uptime**, reducing response latency by **40%** and supporting cross-platform clients.
 - Automated **CI/CD pipelines** using **GitHub Actions** and **Docker**, reducing deployment time by **50%** and maintaining **90%+ test coverage** throughout the release lifecycle.
- **Road Damage Detection Using Deep Learning***YOLOv8 - Python - PyTorch*
 - Engineered a robust deep learning pipeline using **YOLOv8** and **PyTorch** for road damage detection, achieving **92% mAP** accuracy on a dataset of **40,000+ images**, significantly enhancing detection reliability.
 - Leveraged **Python** for data preprocessing and augmentation, reducing model training time by **35%** while maintaining high convergence stability through multi-epoch training across **50+ epochs**.
 - Implemented advanced data annotation strategies and optimized training protocols, improving crack and pothole classification accuracy to **92% mAP** and model performance efficiency by **30%**.

Certifications

- **C# Advanced Topics: Classes, Interfaces and OOP** - Udemy
<http://ude.my/UC-42e6805d-8fae-4401-9336-b3e7d79b8bc2>

Achievements

- Received the **“Pat on the Back”** award twice at Hexagon Capability Center India for outstanding bug resolution under tight deadlines.
